

MatrikonOPC Messenger

Create notifications based on OPC data and send those reports to email, text, or PDF reports

With MatrikonOPC Messenger, you can create notifications and reports from any OPC A&E (alarms & events) enabled source. With this stand-alone software, users can quickly create email alerts based on process data, or generate PDF and text reports.

MatrikonOPC Messenger is an OPC A&E client that sends messages to alert an operator of alarm and event conditions. Messenger provides the ability to connect to multiple OPC A&E event servers. Messages can be delivered to an operator by email, or a batch file script can be executed to trigger additional automatic actions.
